Topic: **Cyber resilience in a disruptive world: managing security in Fonterra**

Resilience is the ability to withstand and recover from unexpected events. Cyber-security has its own share of unexpected events (think WannaCry, or, if you're an old hand SQL Slammer). As technology changes, the range of unexpected events increases. From Business Email Compromise (phishing to make money), Mirai (DDoS attack by baby monitors & cameras) to weaponised emails (wikileaks publishing email originating from Russian hacking during the U.S presidential election). This talk will cover how basic security hygiene practices, strategic planning, and good business communication improve Fonterra's cyber resilience.

Presenter: Ofer Reshef

Ofer is the Manager – Digital Security & Risk in Fonterra's Global Information Services. Ofer has been driving the vision of "sharing information with confidence on any platform" through a series of initiatives to improve Fonterra's security's posture, communicate the importance of security and incorporate security into the way Fonterra develops and manages IT systems. Ofer holds a MSc. in Electrical Engineering and is CISSP and CRISC certified.

Koro Tawa

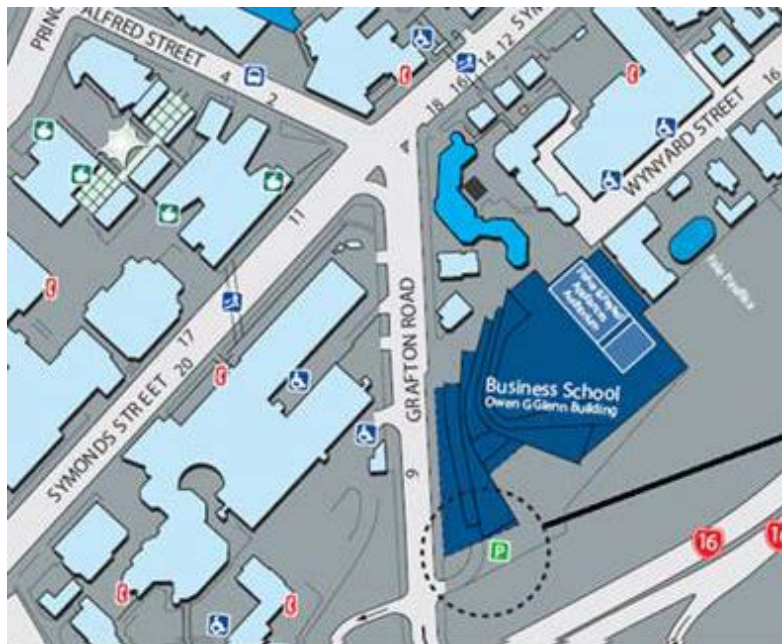

For NZISF Chair

This meeting of the New Zealand Information Security Forum is proudly sponsored by:

NZISF is a Special Interest Group of the NZ Security Association. For more information about us see: <http://security.org.nz/nzsif/>

Parking information:

Car park under Owen Glenn Building accessed from Grafton Rd. Take lift to level 1 (NOT: P1!), then enter the building
